

# INTRODUCING VETO™ MITICIDE. TOUGH ON MITES, SOFT ON BENEFICIALS.

California tree nut and vine growers have a reliable, new tool in the fight against destructive mites. VETO™ miticide provides rapid knockdown and long-lasting control of harmful mites at all life stages while preserving beneficials and predator mite populations. The liquid formulation and low use rate make VETO an excellent addition to IPM-friendly mite management programs in orchards and vineyards in California.

## ACTIVE INGREDIENTS

*Acequinocyl*

## FEATURES & BENEFITS

- Rapid knockdown with lasting control
- Easy-to-use SC (liquid) formulation
- No known cross-resistance
- Soft on beneficials and predatory mites
- Compatible with IPM and resistance management programs
- 7-day Pre-harvest Interval (PHI)
- 12-hour Re-entry Interval (REI)

## KEY CROPS

Tree nuts  
Grapes

## KEY PESTS CONTROLLED

Pacific spider mite  
Strawberry spider mite  
Two-spotted spider mite  
Willamette spider mite

## APPLICATION AND USE INFORMATION

**USE RATE:** 16 fl oz/A

**PHI:** 7 days

**REI:** 12 hours

**MIN RE-TREATMENT  
INTERVAL:** 21 days

**MAX APP:** 2 per season

**TIMING:** VETO should be applied when threshold populations are observed. Do not wait until large mite populations are present.

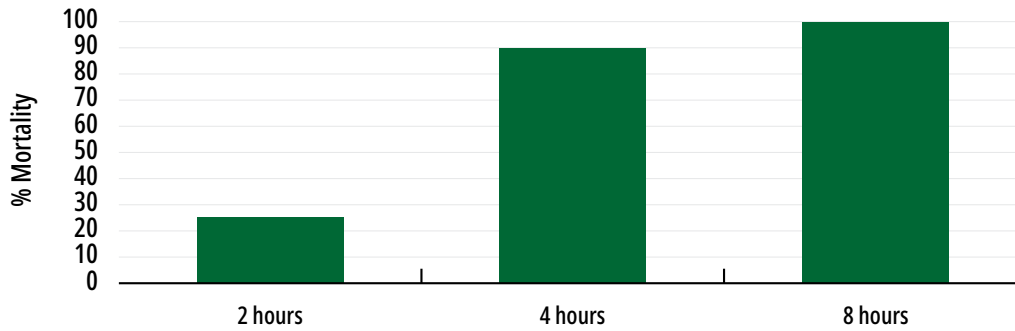

**VOLUME:** 100 GPA minimum

## BEST-USE PRACTICES

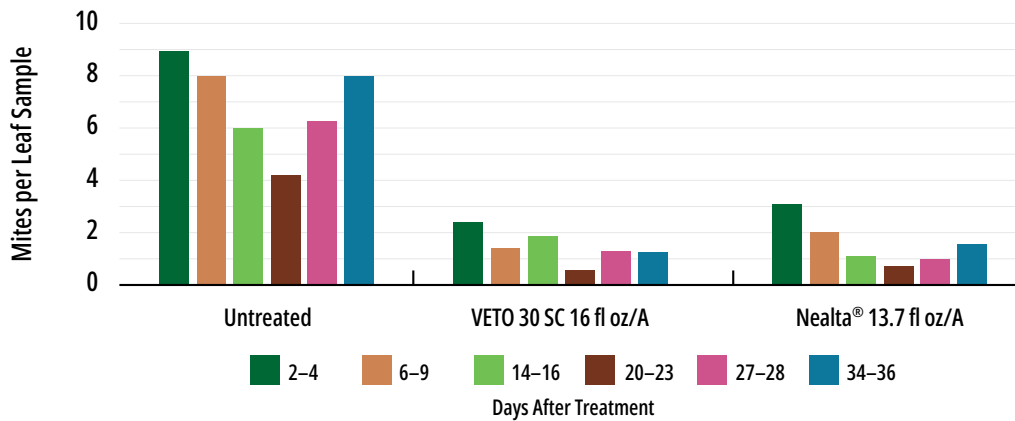

- Ensure complete coverage
- Buffer spray tank — a pH of 5.5–7 is ideal
- Include a high-quality adjuvant
- Recommended tractor speed to 1.5–2 mph

## VETO EFFICACY ON KEY CROPS

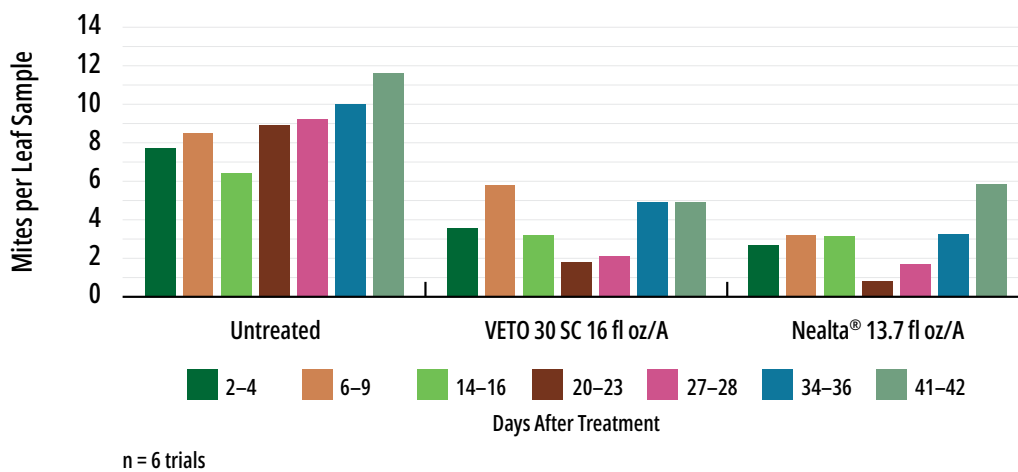

### MORTALITY OF VETO TREATED TWO-SPOTTED SPIDER MITES OVER TIME

### GRAPES: PACIFIC SPIDER MITE MOTILES

### ALMONDS: PACIFIC SPIDER MITE MOTILES
